## SUMMARY

---

Full-stack developer and founder of GenTech Labs — an AI-agent product lab with 15+ shipped public repositories spanning x402 payment infrastructure, DeFi agents, and multi-agent orchestration. Strong in Python and JavaScript, working knowledge of Rust. Seeking remote AI-training and code-evaluation work.

## SELECTED PROJECTS — GENTECH LABS (GITHUB.COM/GENTECHLABS)

---

### **Sovereign Model Router** — *Python*

Model scoring + routing intelligence API (MSS v2) with x402 per-request payment rails. Live deployed service.

### **GenTech 0G DeFi Agent** — *JavaScript*

"The Agency of Traders": decentralized AI DeFi agent built on 0G.

### **r402** — *Rust*

SDK for the x402 payment protocol.

### **iAgent**

Agent fine-tuned on the Injective trading framework and documentation.

### **GenTech Agent Kit** — *Python*

One-install full agent stack: MCP server, skills, plugins, orchestration.

### **Solana Homebase**

Agentic treasury MVP (Superteam tranche-2): on-chain balances, sweeps, reporting.

### **Lineage Guard** — *Python*

Blast-radius analysis agent; DataHub Agent Hackathon submission.

## TECHNICAL SKILLS

---

|                    |                                                                                                |
|--------------------|------------------------------------------------------------------------------------------------|
| <b>Languages</b>   | Python, JavaScript/TypeScript, Rust, SQL, Solidity (working)                                   |
| <b>AI / Agents</b> | Hermes Agent, MCP (Model Context Protocol), multi-agent orchestration, RAG, prompt engineering |
| <b>Web3</b>        | x402, ERC-8004, Solana, Injective, 0G, EVM (Base/Arbitrum), DeFi protocols                     |
| <b>Infra</b>       | Linux VPS admin, Docker, nginx, Cloudflare Workers, cron automation                            |

## EXPERIENCE

---

### **Founder & Sole Builder** — **GenTech Labs** (2026 – present)

- Shipped 15+ public repos: payment-protocol SDKs, trading agents, agent frameworks, open specs (incl. Unified Memory Router, ARD Spec)
- Operates a five-agent AI fleet on a 24/7 VPS — cron automation, inter-agent handoffs, monitoring
- Deploys and maintains live web services: portfolio, dashboards, APIs

### **Full-time** — **Amazon** (fulfillment / delivery operations)

- Parallel-track career transition into software and AI engineering

## HACKATHONS & COMPETITIONS (SUBMISSIONS, ALL SHIPPED)

---

- **Encode Club** — Programmable money: x402 payment gateway on Arc
- **DataHub Agent Hackathon** — Lineage Guard
- **Superteam** — Agentic Treasury, tranche-2 MVP

## EDUCATION & CERTIFICATIONS

---

- **AWS Certified Cloud Practitioner** — In Progress
- **Cyfrin Updraft** — Solidity & smart contract development — In Progress
